TEXT TO ENTER

ONE PASS. ANY DEVICE. EVERY LOCATION.

parkonect

THE COMPLETE CONTACTLESS SOLUTION

Your Parkonect hardware is now a contactless ticketing system.

Now more than ever, there has been a race to eliminate friction and touch-points in the customer's journey to parking facilities. Interestingly, most recent solutions by PARCS vendors requires installing new hardware components....until now.

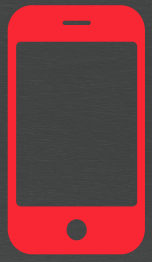
Introducing **Text to Enter** – a revolutionary software feature available at any garage with Parkonect hardware.

With Text To Enter, we make it simple and never require a customer to download an app to get a contactless experience:

- Rapid Deployment across all your facilities within minutes
- Available at every Parkonect location TODAY
- 100% contactless; no additional hardware required
- Mobile payments & validations via parkingcashier.com
- Completely digital receipts from getmyreceipt.com

- Customers simply text 'park' and instantly receive their ePass.
- Customers scan their ePass at entry, the transaction starts and they receive a 'welcome text' with a link to make a payment directly through their mobile phone.
- Getting a receipt is as simple as clicking a button, as we provide eReceipts.

Text to Enter is an end-to-end contactless customer journey solution. No different than a printed ticket, the ePass uses your garage's rate tables and validation programs. We just made it simple and touchless.



Before you rush to "upgrade" your hardware;
Text 'Park' to 844-930-3444 and experience it for yourself!
